Part 9	allocation of individual bolt-ons

Customer: Sample Company
Connections: 192
Current Tariffs: Vodafone & O2 Tariffs

Current Charges	monthly	annually
For all connections:	£7,000	£84,005
Average per connection (ARPU):	£36	£438

Most Competitive Alternative	monthly	annually
For all connections:	£6,541	£78,488
Average per connection (ARPU):	£34	£409

Financial Saving	monthly	annually
For all connections:	£460	£5,517
Average per connection:	£2	£29

Based on the analysed bills, a saving of 7% (or £5517 per year) would be achieved on the optimum tariffs. A detailed breakdown of the recommended tariffs is shown in Part 7.

The analysis has been carried out by Tariffcom Ltd - the UK's leading independent telecoms pricing consultancy. Specialising in the analysis of fixed-line and mobile telecoms tariffs, the company provides services and analysis software to many leading network operators as well as telecoms consultants and end-users.

One of the company's key attributes is its independence and all analysis involved in the creation of this report is completely impartial. To discuss this report or any of our services contact Tariffcom, quoting the reference number shown on the front cover of this report.

- The cost of each individual call has been calculated at each of the alternative tariffs included in the audit. Although over 50 tariffs may have been included in the analysis, only the results for the most competitive ones are shown in this report. The analysis takes account of any minimum charges, bundled calls and discount schemes.
- 'Company Mobiles' means calls between the handsets which have been analysed for this report. It is assumed that all handsets will be moved to the same network and, for example, existing Vodafone to Vodafone calls will become EE to EE if they move to the EE network.
- Where the bill indicates that a call is cross network (i.e. to a mobile number on a network other than the originating network) but doesn't specify which of the other networks the call is to, we assume that the number has not been ported and that the called handset is on the network which was originally allocated the dialled number.
- The results shown are based on the data analysed. There is no guarantee that the same savings will be achieved on future bills as the call-profiles of these could be significantly different from those analysed.
- The comparison excludes connection charges and all figures in the report are exclusive of VAT.
- Details of the bills analysed for this report (including the invoice dates) are shown in Part 6.

Notes:

1. All charges exclude VAT
2. 'Current Rental' includes any charges for itemised billing
3. 'National Calls' includes calls to UK numbers beginning '01' or '02'
4. 'Company Mobiles' means calls between the handsets which have been analysed for this report.
5. Where the mobile network called cannot be identified from the billing information, we assume that the call is to the network originally owning the number range.
6. 'International' means any call from the UK to another country
7. 'Roaming' means any call made or received by the handset while the user is abroad
8. 'Other' includes calls to Directory Enquiries, 0845, 0870 and Premium Rate numbers as well as Premium Text or Information Services
9. Average minutes per connection figure is based on voice handsets only
